

TABLE OF CONTENTS

FOREWORD AND ACKNOWLEDGMENTS	iii
TABLE OF CONTENTS	v
LIST OF FIGURES	ix
LIST OF TABLES	xiii
1 INTRODUCTION	1-1
1.1 Impetus for Updating the Prior Documents in the FEMA Seismic Considerations Series	1-3
1.2 Objectives and Scope of this Document	1-4
1.3 Document Contents and Organization	1-6
1.4 Document Formatting and Icons	1-8
2 SEISMIC RISK MANAGEMENT	2-1
2.1 Seismic Risk: An Overview	2-1
2.2 Seismic Risk Management: A Holistic Approach for Reducing Earthquake Impacts	2-4
2.3 Evaluating Seismic Risk Consequences as a Basis for Developing a Risk Management Plan	2-6
2.4 Design Strategies	2-9
2.5 Business Strategies	2-13
2.6 Event Response Strategies	2-15
2.7 Choosing an Optimal Combination of Risk Reduction Strategies	2-18
2.8 Example Implementation of a Risk Management Program	2-19
2.9 Seismic Risk Management Advocacy	2-20
3 IDENTIFYING AND ASSESSING EARTHQUAKE- RELATED HAZARDS	3-1
3.1 Introduction	3-1
3.2 Earthquake Ground Shaking Hazard	3-1
3.3 Collateral Seismic Hazards	3-8
3.4 Other Collateral Hazards	3-10
3.5 Guidance for Assessing Earthquake-Related Hazards ..	3-16
3.6 References and Further Reading	3-21
4 PERFORMANCE-BASED ENGINEERING: AN EMERGING CONCEPT IN SEISMIC DESIGN	4-1
4.1 Seismic Design Provisions in Building Codes	4-1
4.2 Expected Performance when Designing to Current Codes	4-3
4.3 Current Specifications for Performance-Based Seismic Design	4-6
4.4 Impact of Performance-Based Strategies on Future Design Codes	4-18
4.5 Guidance for Design Professionals	4-23
4.6 References and Further Reading	4-24

5	IMPROVING PERFORMANCE TO REDUCE SEISMIC RISK	5-1
5.1	Introduction	5-1
5.2	Selection of Structural Materials and Systems	5-2
5.3	Selection of the Architectural Configuration	5-5
5.4	Consideration of Nonstructural Component Performance	5-6
5.5	Quantifying the Benefits of Improved Performance	5-11
5.6	Costs of Improved Performance	5-19
5.7	Case Studies of Cost and Performance Considerations	5-23
5.8	Quality Control During the Construction Process	5-30
5.9	Summary Recommendations for Improving Seismic Performance	5-31
6	DESIGN AND PERFORMANCE ISSUES RELATING TO COMMERCIAL OFFICE BUILDINGS	6-1
6.1	Introduction	6-1
6.2	Performance of Office Buildings in Past Earthquakes	6-3
6.3	Performance Expectations and Requirements	6-5
6.4	Seismic Risk Management Issues	6-6
7	DESIGN AND PERFORMANCE ISSUES RELATING TO COMMERCIAL RETAIL FACILITIES	7-1
7.1	Introduction	7-1
7.2	Performance of Commercial Retail Facilities in Past Earthquakes	7-3
7.3	Performance Expectations and Requirements	7-4
7.4	Seismic Risk Management Issues	7-4
8	DESIGN AND PERFORMANCE ISSUES RELATING TO LIGHT MANUFACTURING FACILITIES	8-1
8.1	Introduction	8-1
8.2	Performance of light Manufacturing Facilities in Past Earthquakes	8-3
8.3	Performance Expectations and Requirements	8-3
8.4	Seismic Risk Management Issues	8-5
9	DESIGN AND PERFORMANCE ISSUES RELATING TO HEALTHCARE FACILITIES	9-1
9.1	Introduction	9-1
9.2	Performance of Healthcare Facilities in Past Earthquakes	9-3
9.3	Performance Expectations and Requirements	9-5
9.4	Seismic Risk Management Issues	9-6
10	DESIGN AND PERFORMANCE ISSUES RELATING TO LOCAL SCHOOLS (K-12)	10-1
10.1	Introduction	10-1
10.2	Performance of Local Schools in Past Earthquakes	10-2
10.3	Performance Expectations and Requirements	10-4
10.4	Seismic Risk Management Issues	10-4

11	DESIGN AND PERFORMANCE ISSUES RELATING TO HIGHER EDUCATION FACILITIES (UNIVERSITIES)	11-1
11.1	Introduction	11-1
11.2	Performance of Higher Education Facilities (Universities) in Past Earthquakes	11-3
11.3	Performance Expectations and Requirements	11-5
11.4	Seismic Risk Management Issues	11-5
12	RESPONSIBILITIES FOR SEISMIC CONSIDERATIONS WITHIN THE DESIGN TEAM	12-1
12.1	Introduction	12-1
12.2	Developing a Unified Approach Within the Design Team	12-1
12.3	Design Team Member Roles and Interaction	12-2
12.4	Communication Issues During Design-Build and Fast-Track Projects	12-4
12.5	Checklists to Facilitate the Design and Construction Process	12-5
12.6	Design and Construction Quality Assurance	12-10
	REFERENCES	13-1
